Cleaning, care and protection in sensitive areas

Stainless Steel Care Spray was specially formulated for the cleaning, protection and care of brushed, matt and polished stainless steel surfaces in sensitive areas. The special spray can be used in the food and beverage industry, in canteen kitchens as well as in the pharmaceutical and medical industry. The spray has an NSF registration (A7) and can be used in food processing areas. It removes smudges and fingerprints, reduces oxidation and corrosion, cleans even larger surfaces streak-free, leaves a long-lasting protective layer, and makes water roll off. It has an antistatic effect and adheres even to vertical surfaces.
